

## TRIALECT Short-Term Dermatology Visiting Fellowship in Rome

As the Covid-19 pandemic related restrictions have been relaxed in Italy, many of our trialect trainees have secured visas and already started traveling to the fellowship destinations. The faculty from the San Gallicano Dermatological Institute, IRCCS, Rome, Italy invite all physicians for a short-term dermatology visiting fellowship to pursue a Short-Term dermatology fellowship (certified) on [Trialect](#). Trialect Global Medical Education Program will sponsor highly qualified merit candidates (not based on socio-economic status), and help with the waiver of Hospital Administrative Surcharges. As the deadline is fast approaching, we would appreciate if you can refer interested students/colleagues/fellows. Click here for more details: [Apply Here](#)  
<https://trialect.com/dermatology-fellowship-2/program-details-brief>

In our Institute fellows will gain some experience in non-invasive techniques for skin neoplasms and inflammatory disease diagnosis and management. In specific the following devices will be described using lectures and technical descriptions; later they will be observed in use on the patients and practically and actively used by attenders on in vivo models:

- Digital dermoscopyReflectance
- confocal microscopy
- Optical coherence tomography
- Thermography
- High-frequency Ultrasound
- Bioengineering: TEWL, Sebumeter, Laser Doppler, Colorimeter, Corneometer.

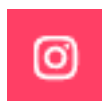

Thanks,

SandraMiller
